

Spiritual Gifts – Leadership Formation & Character Development

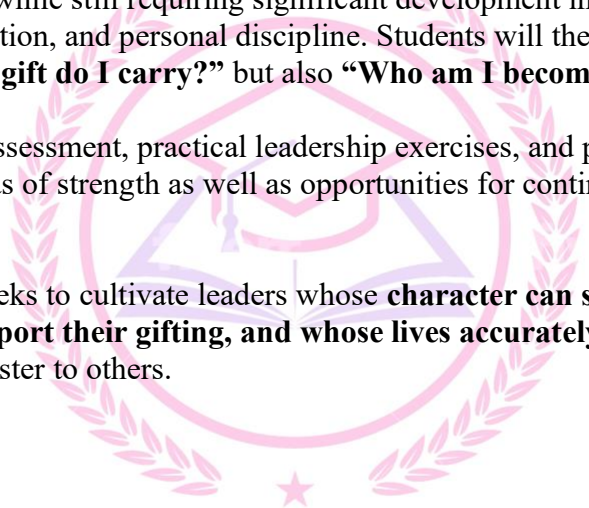

Spiritual Gifts – Leadership Formation & Character Development is an intensive course designed to move emerging Kingdom leaders beyond simply identifying their spiritual gifts into understanding the **character, maturity, discipline, and responsibility required to steward those gifts effectively.**

Students will explore the biblical foundation and operation of spiritual gifts while examining how **leadership formation, personal character, integrity, humility, accountability, spiritual discipline, and servant leadership** directly affect the way those gifts are expressed.

Special emphasis is placed on the truth that **giftedness is not the same as maturity.** A person may be spiritually gifted while still requiring significant development in character, leadership, relationships, communication, and personal discipline. Students will therefore be challenged to examine not only **“What gift do I carry?”** but also **“Who am I becoming as I carry it?”**

Through Scripture, self-assessment, practical leadership exercises, and personal reflection, students will identify areas of strength as well as opportunities for continued growth and development.

Ultimately, this course seeks to cultivate leaders whose **character can sustain their calling, whose maturity can support their gifting, and whose lives accurately represent Christ** as they lead, serve, and minister to others.
